

A Must See Slide Show – When A Soldier Comes Home

Description

Found the link to a post at Strategy Page @ Captain B's [One Marine's View](#) blog.

I suspect it was done by CPT Allison Crane, RN, MS, a mental health nurse observer-trainer from the 7302nd Medical Training Support Battalion, and is titled "[When a Soldier Comes Home From War](#)".

Fine work, expresses much, and the best 2-3 minutes (but you can spend many more) looking at the 21 slides that comprise this excellent reminder of a combat soldier's return to "the World," but about life in general, too.

Here's a few of the slides:

They all are worth looking at. Do yourself a favor, go and check it out and see small pictorial of how our service members live in the current combat zone.
