

From the Desk of Col George Dodenhoff, USMC “ Part 3

Description

Subtitle: First Flight

On September 10th, 1943, Dode made his first recorded flight. He would have been sitting in the forward seat, with Lt Doran (service unidentified “ it could have been wither a Marine, or, maybe more likely due to the missing “œ2” or “œ1,” may well have been a Naval aviator) in the rear seat as his instructor pilot.

Flying 1.5 hours, he began his career as a Marine Aviator. Without comment in the notes section, it must have been a routine flight.

Based on the equipment issued to him (the N2S-3), I”m going to presume the flight occurred a

The image shows a handwritten flight log from a Stearman PT-17 aircraft. The log is divided into two columns: "FLIGHT DATA" and "REMARKS". The "FLIGHT DATA" column has sub-columns for "Date", "Time", "Duration", "Pilot", and "Instructor". The "REMARKS" column is for notes. The log contains several entries, including one on September 10, 1943, with Lt Doran as the instructor pilot. The log is handwritten in blue ink on a yellowed, aged piece of paper.

His aircraft logged was the ubiquitous N2S, the legendary primary trainer in WWII, but better known to many as the Stearman PT-17, Bureau Number (or “œBuNo” in official abbreviation for future reference in this series) 07732. The particular variant, the -3 version, one of 1875 delivered to the US Navy, with the Continental R-670-4 Radial engine.

The actual manufacturer’s formal designation was the [Boeing-Stearman Model 75](#) The N2S was the Navy designation. for the aircraft. In this regard, he was having the common experience for the aviators of this time. This airframe was used by the US and Canadian forces, with over 10K of them being made between the production in the 30s and 40s. After WWII, they were sold as surplus, helping kickstart the General Aviation market for private pilots. These surplus planes were widely used for crop dusting and airshows for wing walkers.

Some of the type of training for flying Col Dodenhoff would have received would have been like what is contained in this WWII flight training video:
