Iâ€™m Crushed

Description

I like science stuff, in fact I was loaned the CDs for â€œA Short History of Nearly Everythingâ€• by Bill Bryson. If you like books on tape (CD) and are facinated how our speices figured out all the stuff we have, I recommend this.

As a long time skydiver, Iâ€™ve studied a little physics. That also facinates me. By, today (and please pardon the pun), Iâ€™m crushed, as I just found a weblog that led me to an article that says Black Holes donâ€™t exist.

Besides having to drop all refernecs to such things as â€œsingularlityâ€• and event horizonâ€• from my vocabulary, just hink of all the scifi that will have to be rewrittenâ€¦
