Why UXO Makes Bad Paperweights

Description

Even if it looks really cool and has the possibility of being a great babe magnet, even before this incident, I have always declined to have percussion fired ordnance as paperweights on any of my desksâ€¦stick with electically primed is my advice. A 5â€³54 cal round will do nicely and can also be used as an anchor if you live in New Orleans and the hurricanes come.

> The explosion also destroyed a computer keyboard, scattering some of the keys around Collaâ€™s desk.

So even if his fingers come out of this OK, heâ€™ll be having a hard time typing whole words from now on, tooâ€¦
