Good and Evil Use of PhotoShop Software

Description

Welcome LGF Lizards!â€¦.

While youâ€™re here, feel free to browse my attempts at writing and please visit some of the excellent MilBlogs listed to the right!

â€”â€”â€”â€”â€”â€”â€”â€”â€”â€”â€”â€”â€”â€”-

Evil use of Photoshop:

First noticed on LIttle Green Footballs August 5th. It has sent ripples across the world, with Reuters trying to back-pedal from the photog that seems to have a penchant for â€œmodifying the truthâ€• via digital software. Not a good thing at all, and there are plenty of people, more plugged in and more capable thatn I to comment. Stroll over to LGF (the main page via the link under the picture) and youâ€™ll get a few more than a few eyefulls of the discussion, among many other blogs/news reports.

Good use of Photoshop:

< Microsoft Zune Blue Screen

If youâ€™re a submariner, then this would also be considered a good use of photo editing software:

Torpedo Surfer

Then again, you can appreciate if youâ€™re from the VP-, HS-, HSL-, VS- or surface community, too. Just a Mk 46 would be a smaller â€œride.â€•

Thanks to Little Green Footballs for the Open Thread!
