LBS-1: Light Border Surveillance Squadron One?

Description

I read about this in this in â€œParachutistâ€• this month, and AW1 Tim, a regular at Neptunus Lex send a link to the video for the a Batman like contraption using small Jet Cat turbines a strap on your backâ€¦

Jet Cat

I suggest Lex retire and form a squadron for border surveillance. I can handle the XO/Training Officer, Tim the electronics (digital cams to transmit the images back to Border Patrol). Between Steel Jaw Scribe and Skippy-san, thereâ€™s plenty of AEW experience for OPS and maintenanceâ€¦

Whoâ€™s in?

default watermark

And, if Lex isnâ€™t interesting working as a contractor, thereâ€™s always air shows to be doneâ€¦.

Update 12/24/2006: RTO Trainer wants to be the Commo, and I should have shown a designator of VAW(L) One. That fits the nomenclature â€œmoldâ€• for the Navy better.
