For the Lazy Navigator or the Curious Person

Description

From Celstron, the â€œSky Scout.â€•

default watermark

It uses GPS to tell you (computerized voice) what stars/constellations to look for as you point it around. You can also access a menu and select a celestial object/planet and it will giude you to looking at it in the â€œLocateâ€• mode.

15.2 oz, without batteriesâ€¦.and, Iâ€™d certainly be careful about using it in the presense of your enemies, lest they figure out where you are while it tells you what youâ€™re looking atâ€¦.

Hey, at $399 (plus shipping and applicable sales tax and the cost of some batteries), you can afford to skip your Junior Year NROTC navigation courseâ€¦
