# Funny, But Not â€“ Hypersensitivity Run Amok

## Description

From the wonderfully insightful work of Cox and Forkum site:

Cox and Forkum CAIR and

CAIR is raising a ruckus about the depiction of terrorists. It follows the pattern. Pick away at any situation here in the US that makes them â€œfeelâ€• bad, yet never stand up and condemn the beheading/torture/slaughter of anyone in the Middle East, or Thailand or the Philippines, or Malaysia (you get the idea.

The plan? Well, make us afraid to even comment that Muslims may be connected with terror, which makes it easier to walk on buy with evil intent, and we are afraid, for fear of lawyers championing the â€œcause.â€•

default watermark

On top of that, what word can we use to epand the description beyond â€œhyper-?â€• As with credit cards types, first they were just cards, then â€œGoldâ€• cards, then â€œPlatinumâ€• and now â€œTitanium.â€• Before long, you just run out of elements in the periodic table and then what do you do? Weâ€™re kinda already at the end of the modifier run for descriptions of over the top reactionsâ€¦.suggestions?
