Ship History â€“ Coming Soon

Description

I enjoy reading the hisotry of military things, with an emphasis on Naval matters. Between several of the Navy bloggers, thereâ€™s plenty to do. EagleSpeak, CDR Salamander and SteelJaw Scribe all have great regularly scheduled posts on history.

I have been pondering covering ship classes for a while now, but recently began reading â€œSix Frigatesâ€• and have run across a laundry list of names that I have heard ships named after. I knew the history of some of modern day names ships have been named after, but never paid attention to those from a few centuries ago. I think itâ€™s time, supported by the wonderful story Ian Toll tells, to connect those who put our Navy to sea in the 1790â€™s, and fought our first battles to the issues they faced in a new nation to the ships that were named in their honor. My pastor regularly says â€œContext is everything.â€• Here is a case in which this applies.

Iâ€™m not sure if Iâ€™ll make it â€œShip History Saturdayâ€• or just pick a day and go for it, but watch for it soon.
