Need a Great Photo Editor/Graphics Program (psst! itâ€™s FREE!)?

Description

Paint dot Net. Not only is it freeware, it nags you not, it does layers, varied â€œopacity,â€• has shapes, brushes, fonts, erasers, and not only does it have some useful effects loaded in, you can download a raft of free plugins to do things like make a picture on a spherical background, inject clouds, align objects, etc, etc, etc, via the Paint.Net user forum.

I do my headers with it, because itâ€™s quick, simple and has plenty enough features to drop the SWO pin and lettering on top of a cropped pic to header dimensions.

High quality AND free (with a PayPal button if you feel inclined to use it)!
