I Can Hear Lex Now: â€œNo Objectionâ€¦â€•

Description

It seems the best bet to keep spares out of the wrong hands is to clip â€œthemâ€• into little bitty pieces.

After all, the only country besides the US to ever fly the F-14 TOMCAT happens to be the guys who like to spread mayhem via the back-channels, hoping they wonâ€™t get caught. So, make them into Bud cans and our valiant aviators and missileers wonâ€™t lose sleep over splashing an American icon, even if it wears a desert colored paint scheme.

Lex, Iâ€™m sure will be sneaking to his computer late at night, Guinness in hand, to watch this over, and over, and over in the darkâ€¦

Update: See, what did I tell you? But to be fair, he went one betterâ€¦Maybe the F-14 challenges his fighter-pilotness or sumthinâ€™ (not that thereâ€™s anything wrong with thatâ€¦)
