DLP HD and 3D TV

Description

Samsung is cranking out DLP TVs that are able to provide fast enough frame rates so you can see 3D images. You will need to wear your shutter glasses, but theyâ€™re wireless. Low end for the TV is $1499, but can run towards $4500 (size) and then youâ€™ll need a media center type PC.

Samsung HL-T5087S DLP HD 3D TV

David Berlind from ZDNet has a little report and video on the new toyâ€¦.
