Time Out for Mechanicsâ€¦

Description

â€œMade ion Americaâ€• with cheap and poor quality parts fabricated in China.

Iâ€™m going to stand in the sun and practice mechanical skills with regards toi feul and cooling systems on a Dodge that is my transportation.

This is number three major issue to arise during ownership, the result of poor product standards. Details laterâ€¦

So, a question for anyone interested in chipping in two cents (and you donâ€™t even need PayPal!), ponder this:

default watermark

The routine Monday posts are titled â€œMonday Maritime Matters.â€• Would it be too fadish to rename it to â€œMonday Naval Contemplations?â€•

Just a thought.

Input, as simple as â€œYes/Noâ€• accepted. More lengthy thoughts appreciated as well.

Next thought: I donâ€™t have some magical WordPress plugin to rotate my header graphics, but I can whip out topical pictures pretty quickly. Not that this is a well travelled blog, but if you have a picture of merit, with some connection to mostly nautical things, and would not mond having a SWO pin and some brand name lettering overlaid on it, Iâ€™d be happy to put it on the hosting server for regular use. Some topical stuff for holidays, special occasions, or maybe earthscapes/astronomy stuff, too. Format is 730 px wide x 200 px tallâ€¦can go up to 900 px wide, too, if it frames better. let me know if youâ€™d like to participate.

Be back in a few (hours)!
