Technology Tuesday

Description

Those crafty scientistsâ€¦.

I have a habit of using ergonomic keyboards. Have for years. Itâ€™s another area that draws my attention, partially for the better speed of input, but also out of concern for the opportunity to keep at it longerâ€¦

Kannuu How

Soâ€¦the new news is that Kannuu

has come up with a thumb operated device that has shown the capability of inputs up to 60 wpm!Ã, Yep, looks like a cell phone, but I bet it wonâ€™t be long before someone adapts it to a Bluetooth interface for a desktopâ€¦

How do it know? It anticipates the next letter/set of letters, like your web browser address bar, when you begin typing in an site URL.

Say goodbye to Carpel Tunnel!
