Technology Tuesday

Description

Dust off your old slide rules and HP RPN calculators! Get the big roll around fan and some plywood and get to work on making a makeshift wind tunnel, coz youâ€™re gonna need it to compete in this!

You donâ€™t have to make it up and back into space two times to become a millionaire, you just have to make a really efficient ground bound method of transportation.

Rules will be published this summer (2008), but no time like the present to start scheming on how to change the world now.
