Holy Snikes!

Description

Parallel universes? Nope. Parallel Internet.

Cloud Computing will drive it:

> From The Sunday Times
> April 6, 2008
> Coming soon: superfast internet
> Jonathan Leake, Science Editor
>
> THE internet could soon be made obsolete. The scientists who pioneered it have now built a lightning-fast replacement capable of downloading entire feature films within seconds.
> At speeds about 10,000 times faster than a typical broadband connection, Ã¢â‚¬Å“the gridÃ¢â‚¬Â• will be able to send the entire Rolling Stones back catalogue from Britain to Japan in less than two seconds.
>
> The latest spin-off from Cern, the particle physics centre that created the web, the grid could also provide the kind of power needed to transmit holographic images; allow instant online gaming with hundreds of thousands of players; and offer high-definition video telephony for the price of a local call.
