Memorial Day 2009: Map the Fallen Tribute to Iran and Afghanistan KIAs

Description

Sean from San Francisco has used his geoscience education to create a Google Earth Map layer of those who gave their lives in Iraq and Afghanistan. He has been at this for a few years now, and it now complete.

Take a minute and read of the research and connections to many organizations to indicate the home of record for each of the service men, and see the tribute it will create for their families and friends.

Fitting news for a day such as this, as we remember those who went before us and gave us the gift of continuing freedom beyond their time on this earth.
