Technology Tuesday

Description

Technology. Ã, Someone commented on a blog elsewhere a few weeks back most of mankindâ€™s greatest accomplishments were driven as a function of the need to conduct warfare. Iâ€™ll have to go along with that. While going to the moon has had a vast array of technological advancements, it was to help improve our missile/rocket technology and the abilty to function on the â€œhigh groundâ€• That being said, there is technology developments, more like a â€œfusionâ€• of hardware and software to help our wounded warriors. Laptops and Dragon Naturally Speaking. Life changing, capability restoring. Project VALOur-IT running on raw volunteer power and passion. Join upâ€¦serve the cause. Change a life. Invest in a future citizen out of uniform.

Just when youâ€™d thought youâ€™d read enough about VALOur-IT, Jeff Bacon a noted naval cartoonist, has done his duty to help promote the fund raising campaign.

default watermark

Not only has Jeff jumped in, he connected with Steven Pastis, creator of â€œPearls Before Swineâ€• (an excellent cartoon strip, I might add) to jointly promote helping our wounded warriors.

Here is the first frame

YOu have to go to Jeffâ€™s post to see the rest of the story.

Andâ€¦if you still havenâ€™t been convinced to contributeâ€¦please reconsider and chip in a few bucks, and send the information to your friends, family and co-workers.
