Technology Tuesday

Description

Me likeâ€¦.

Can you guess? Well, Iâ€™ll tell you, since you donâ€™t know how tall she is: 205 INCHES! of viewing experience. From Luxio in Italy.

Have a spare $610K (and the cost of shipping and installation, too)? I hope so, because until enough of the well off buy these, you can bet the prices arenâ€™t going to get any cheaper.

If youâ€™re on a budget, you can get these fine TV screens in 90â€³, 120â€³, 150â€³ and 180â€³ sizes, too.

And in case youâ€™re one of those engineer types, youâ€™ll need to support the 1041 lbs of weight to go along with the 1500 nit contract and 10,000:1 brightness.

For you XBox gamers, Iâ€™d wait: The resolution is only 1344Ã—768. Stuff there will look kinda chunky at that settingâ€¦
